

coarse fraction dosifier and conveying system

industry 4.0

accuracy ∞ continuousness ∞ innovation

Advantages of coarse fraction dosifier and conveying system

- ✓ continuous and highly accurate dosing
- ✓ uniform and pulsation-free conveying of defined quantities
- ✓ high performance and high availability
- ✓ reliable and low-maintenance operation
- ✓ self-contained PLC control
- ✓ application of CO₂ neutral fuels

Technical details

material	wood dust or biomass dust and comparable dusts with fraction size up to 8 mm
dosage machine size	DN 1100 to DN 3000
construction type/equipment	pressure shock resistant/in accordance with ATEX directives
quantity of dosage points	up to 12 dosing units/machine independently adjustable up to 24 conveyor lines/machine
total flow rate	min. 30 kg/h, max. 15.000 kg/h
adjustment range	1 : 10
